#### How the Reverse Industrial Movement works

- 7 Close the protection arm
- 8 Close the wire clasp
- 9 Lock the hook

#### 3 Hands Automatic Caliber MIYOTA 9015

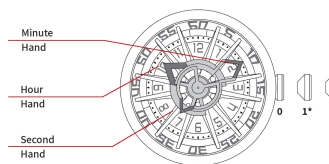

##### To set the time

Pull crown gently to position 2.  
Turn crown to set the hands to desired time.  
Push crown back to position 0.

##### To make full-winded

The watch can be wound by turning the crown 40 times and by wrist movement it maintains the charge. When it's not worn the charge will last for maximum 48 hours.
